

UNSECURED UNATTENDED & DROPPED TRAILERS

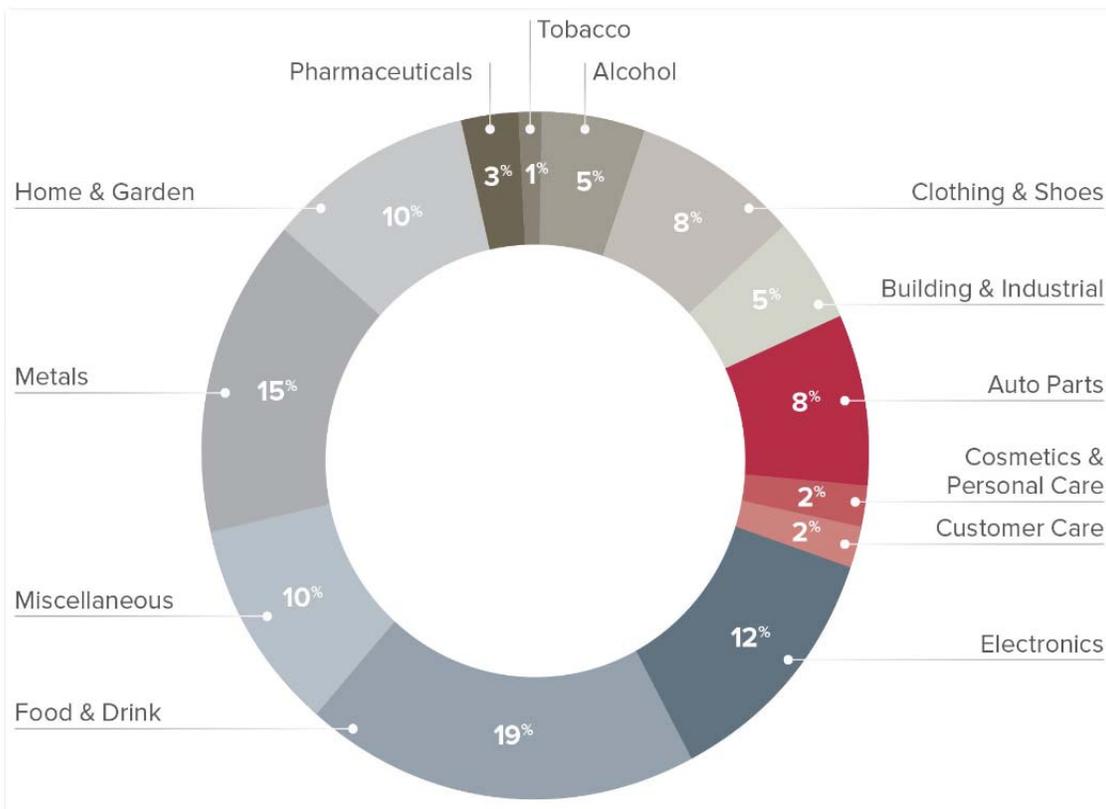

TOP TARGETS

ARE YOU BEING TARGETED?

An estimated \$35 billion in cargo is stolen from the U.S. every year¹, and unsecured and unattended trailers are prime targets. You can often find these trailers at warehouses, distribution centers, and secured yards; which also tend to have a high volume of product stored on site. These locations are hotspots for cargo theft activity, and in recent years, have been ground zero for an estimated 35% of reported cargo thefts.

DEFEND AND SECURE YOUR SUPPLY CHAIN

Address the security of your [supply chain](#) as well as the [physical safety](#) of your employees with a multi-layered approach that includes the proper [vehicle restraint](#).

Dok-Lok[®] vehicle restraints with anti-theft technology act as a visual deterrent to cargo thieves. Additionally, the unit will automatically re-fire if the hook is not properly engaged, or if it has been tampered with. When paired with advanced controls, a Dok-Lok can physically enhance security at a facility by linking with an active building security system. If an engaged restraint is tampered with, the building security system is notified and facility protocol is followed.
