

COMBOSHELTER™ II

SOFT-SIDED DOCK SHELTER

Extended projection side frames

Seal around liftgate and standard trailers alike.

Reinforcing fabric

On inside of side curtains and head curtain helps prevent premature wear.

C-4-style head curtain

Rests with pressure on top of trailer, creating full height clearance inside trailer.

Durable foam frame design

Poly-wrapped foam side frames take impacts from off-center trailers without damage. No need for expensive steel bumpers.

Slim-profile 6"-wide side frames

11'2" overall footprint allows shelter to fit in tight clearance situations.

Pivoting canopy header

Protects unit from damage if trailer comes in off-center and higher than expected. Includes integral rain gutter.

Detachable side curtains

Easily removed for maintenance flexibility or to allow increased air flow on the dock. Reattach in minutes.

Durathon™ fabric

Friction-resistant, highest-wear fabric provides ultimate durability. (Optional)

Firefighter™ protection

Heat-dissipating technology in head curtain prevents burning from hot trailer marker lights. (Optional)

Shown with optional PitMaster™ Under-leveler Seal

GET FULL ACCESS, IMPACTABILITY
AND THE DURABILITY TO WITHSTAND USE
BY LIFTGATES AND STANDARD TRAILERS.

ComboShelter™ II soft-sided shelters are specially engineered to address the unique challenges at docks that accept standard trailers as well as those with lift gates, step ledges or other rear extensions. ComboShelter is built with the added features needed to effectively seal a wide variety of trailer types, and also with additional durability features to hold up under extreme conditions that a mix of trailer traffic can create.

RITE·HITE®

COMBOSHELTER™ II

Ultimate durability

When sealing a variety of trailers that includes liftgates, extending the projection of the unit is only the start. To prevent wear from curtain "backlash" that occurs when standard trailers pull away from the dock, insides of the ComboShelter™ II side curtains and head curtain are specially reinforced. Plus, stable narrow side frames provide increased flexibility and further wear protection.

Ultimate flexibility

Narrow 6"-wide side frames allow the shelter to fit into the narrowest of spaces, and can eliminate the need for expensive repositioning of lights, signs and electrical conduit. 11'2" shelter footprint stays the same, regardless of projection.

Easily removable and reattachable side curtains

Remove, replace or change out Velcro-attached side curtains for the greatest maintenance flexibility. An exclusive Frommelt® feature.

Enjoy your investment for years to come.

Only Frommelt ComboShelter II soft-sided shelters deliver all these exclusive benefits and come backed by a standard 36-month, money-back customer satisfaction guarantee when ordered with premium Frommelt fabrics.

See your Rite-Hite Representative today.

Or visit our website for more information on the ComboShelter II and the full line of additional Frommelt solutions, including the new PitMaster™ Under-leveler Seal. PitMaster keeps facilities cleaner and helps dramatically reduce energy loss at the dock.
