FDSC dock seal with head curtain shown with PitMaster Under-leveler Seal.

FDS Series Dock Seal with Head Pad or Curtain

FDS Series Dock Seals offer high sealing efficiency along with Rite-Hite's signature quality.

1 High sealing efficiency

Tight seal around trailer reduces expensive energy loss, improves facility cleanliness, and helps prevent theft.

2 Durable construction

Reputable Rite-Hite® quality manufacturing. Wear pleats on header corners improve durability and extend product life.

3 Rugged ArmorPleats™

Available on full length of side pads, ArmorPleats provide additional abrasion protection to extend the life of the dock seal. Available in high-strength, friction-resistant Durathon™ fabric for greatest resistance to wear.

4 Advanced head curtain

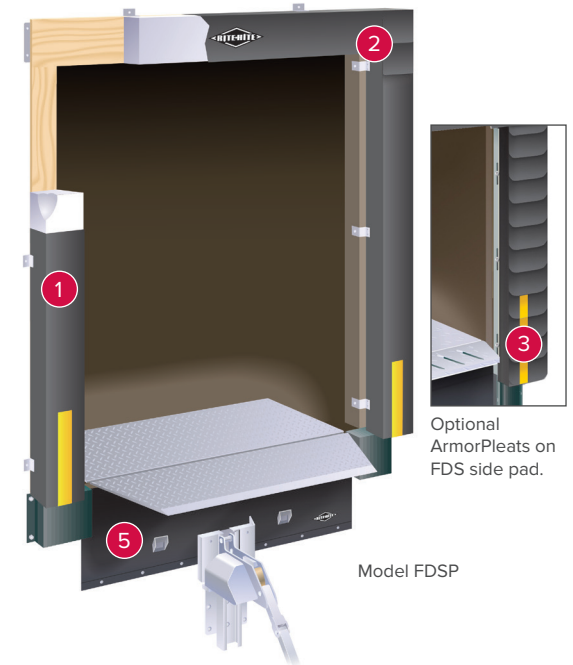

Flexible, high-support structure prevents pooling of water, reduces susceptibility to wear.

Model FDSC

5 Available PitMaster™ seal

Gaps large and small beneath and around the dock leveler are sealed with optional PitMaster components, providing substantial energy savings, improving cleanliness and sanitation.

Model FDSP

FDS Series Seal (FDSP, FDSC)

FDSC Dock Seal.

RainGuard Header Seal.

PitMaster Under-leveler Seal.

Achieve excellent environmental control at the dock.

The FDS foam dock seal is manufactured by Rite-Hite, the industry leader in quality dock seals and shelters. When compressed by the backing trailer, the FDS seal creates a gasket-type seal at the sides and top of the trailer, ensuring high sealing efficiency. This style of enclosure is appropriate for docks that serve a limited range of trailer sizes and that do not require full, unobstructed access to loads on the trailer.

Upgrade to an Insulator™ Dock Seal.

- » Designed for longest durability and lowest lifetime cost of ownership
- » Light-blocking header conforms around trailer irregularities for a better seal
- » High-strength, friction-resistant Durathon™ fabric reinforcing throughout keeps unit lasting longer
- » Standard Firefighter™ heat-dissipation protection in header prevents burning from trailer marker lights
- » Replaceable wear components keep maintenance costs low
- » Backed by 36-month money-back satisfaction guarantee

Insulator Dock Seals.

Add a RainGuard™ Weighted Trailer Top Seal.

- » Tightest header seal available to prevent infiltration of water, dust, wind or snow into the loading dock area
- » Helps prevent costly product damage and contamination and maintain employee safety
- » Weighted gravity-seal design and 15" (381 mm) trailer coverage range ensure tight, consistent seal regardless of trailer height or position
- » Backed by standard 36-month money-back satisfaction guarantee

Complete the Seal with PitMaster™ Under-leveler Seal.

- » Seals beneath and around dock leveler and bumpers
- » Keeps pits and facilities cleaner; helps prevent infiltration of bugs, dust and debris
- » Reduces costly heating or cooling energy losses at the dock
