Rite-Hite Eclipse® Dock Shelter

Coldstore Urk (NL) Case Study

The Eclipse dock shelter offers the most effective environmental control possible for Coldstore Urk's loading dock openings.

"To warrant the integrity of the cold chain at any time it is vital to maintain consistent temperatures at the temperature controlled loading dock area." says Willem Brands, CEO of Coldstore Urk.

In the past, Coldstore Urk used inflatable dock shelters at their loading docks. Inflatable dock shelters create a good seal around a trailer positioned at the loading dock but can easily be impacted or damaged, especially if inflated airbags are not in the stored deflated position before the trailer departs. For several new dock positions Coldstore Urk decided to use Rite-Hite's innovative Eclipse® dock shelters

In a single piece of equipment, the impactable and soft-sided Eclipse dock shelter provides a tight, consistent seal all the way up trailer sides, across the top, and at the corners. Ordinary (collapsible) dock shelters leave gaps where contaminants can enter a facility and expensive energy can escape. Only the Eclipse dock shelter is equipped to fully obscure daylight and effectively seal these gaps.

The Eclipse is the industry's most advanced loading dock sealing system and the first system to block light and seal gaps where previous enclosures have failed, guaranteeing the darkest, most environmentally-secure loading dock possible.

COLDSTORE URK

A Proud Member of **AGRO**
Merchants Group

Company Profile

Coldstore Urk is a flourishing company with multiple cold storage warehouses in three locations. Their core business is cold storage of fish and fish related products. Coldstore Urk is situated in Urk, the Netherlands, right in the heart of the Dutch fishing industry. Together with their partners, they are an important link in the distribution chain of fish throughout the whole of Europe.

Coldstore's spearheads are: Service, Quality and Reliability. Their cold storage facilities are built with the highest quality standards in mind to maintain the quality level of product at its maximum. Hygiene is naturally considered to be of paramount importance in their deepfreeze facilities and they have EU accreditation.

A proud member of AGRO Merchants Group:

AGRO Merchants Group provides innovative cold chain solutions on a global basis by partnering with the highest quality family businesses and creating new, reliable, and integrated trade networks to help its customers grow. The company is investing in modern assets, industry leading technologies, and value-added service offerings to ensure the highest quality supply chain management standards in the industry.
